

LAPF – 80 Automatic Auger Type Powder Filling Machine

Laxmi Pharma Equipment offers compact Automatic High Speed Double Head Powder Filling Machine, Model No: LAPF-80. The machine consist of One Side Turn Table, S.S. slat conveyor belt, Auger type filling head, easy – reach compact panel and with no container no filling system etc.

If you are seeking accurate and fast powder filling solutions in today's competitive world, then nothing is better than the Auger Powder Filling Machine offered by Laxmi Pharma Equipment. This model called the LAPF-80, is a compact, high-speed double-head powder-filling machine that provides the most accurate and reliable performance in the packaging industry. Following is a detailed analysis of this advanced piece of machinery.

Overview

The LAPF-80 Auger Powder Filling Machine is a high-speed, minimum-down-time powder-filling machine developed by Laxmi Pharma Equipment. It combines state-of-the-art technologies to make its functioning effortless and its quality of powder packaging uniform. The main constituents and features cater effectively to the challenging requirements of the modern manufacturing and packaging environment.

Salient Features

- Auger Type Powder Filling Machine.
- Equipped with PLC Touch Screen.
- Electrically Timing Base Dose Adjustment.

- All Product Contact Parts SS 316.
- No bottles No filling System.
- Easy and Fast Change over For Bottle Dia Change.
- Elegant and Easy reach control panel for total control on operation.
- Rigid vibration free construction for trouble free performance.
- SS Endless Slat Conveyor.

Technical Specification

Model	LAPF – 80
No of Filling Heads	2 Heads
Output/ Min	50 to 75 (Depending on powder Quality)
Power Characteristics	230V, 1Phase, 50Hz & 440V, 3 Phase, 50hz, 4 wire system
Input Container	30mm to 100mm Dia
Fill Volume	5gms to 200gms
Filling Accuracy	±2 % (Depending on powder Quality)
Net Weight	500 kg Approx.
