

BGF18-18-6 3 In 1 Glass Bottle Beer Bottling Machine

Glass bottle beer bottling machine is mainly used for the production of various types of beer, cocktails, gas-containing beverages, etc. Beer bottling machine is a three-in-one filling production line, which realizes bottle washing, filling and capping on one machine.

Beer bottling machine makes better use of the safety and sanitation of glass bottles, has good corrosion resistance and acid corrosion resistance, so that the whole process of filling is produced aseptically, and the nutrition of the drink is better preserved.

The beer bottling line adopts a PCL programmable controller, which realizes the automatic control from the bottle entering the machine to the completion of the packaging. The frequency conversion speed control is adopted, which is easy for users to adjust and adjust, and meets the requirements of different processes for production capacity.
