

Automatic 12 Heads Glass Plastic Bottle Rinsing Washing Drying Machine For Liquid Paste Filling Production Line

This automatic bottle washing drying machine is flushed with high-pressure water for a long time to rinse the inner bottle. After the flushing is completed, the water is shut off. At the same station, the high-pressure clean air source is used to dry the inner wall of water. The equipment is suitable for various bottle shapes such as round neck bottles, flat bottles and square bottles etc.

Main Feature

- ▶ It can feed, overturn, wash bottles and drain water automatically, save time and labor.
- ▶ Multiple washing heads can be customized according to production needs.
- ▶ It can work with automatic filling capping and labeling machine to realize automatic production

Parameter

- Voltage: 110/220V
- Nozzle quantity: 12+12(washing+drying)
- Conveyor size: About 5080mm*90mm
- Power: 1.5KW
- Working speed: About 500-2000 bottles/h
- Machine size: About 5080*1460*1930mm
- Package size: About 3410*1710*2100mm
- Package weight: About 650kg
