

DPP-120H Multifunctional Blister Packaging Machine

DPP-120H multifunctional automatic aluminum (aluminum) bubble cap packing machine, the machine is synthesizing the innovative advantages of domestic and foreign aluminum plastic packaging machines. The contact part of the drug is made by stainless steel and high grade aluminum alloy materials, applicable to the pharmaceutical, food, health care products packaging industry plain tablets, sugar coated tablets, capsules, can be packaged tomato sauce, chocolate sauce, honey and so on. The machine adopts the pharmaceutical packaging technology and implementation of GMP production equipment. KOSBEST, one of the pharmaceutical packaging companies, the products have been sold to domestic and foreign pharmaceutical companies and large and medium-sized hospitals, and exported to more than 20 countries and regions, favored by customers.

Features

- It adopts the newest type high-power transmission mechanism to arrange the chain and drive the main driving shaft. The errors and noises of other gear wheel transmission can be avoided.
- Imported controlling system is adopted; also it can be equipped with detecting and rejection function device for number of medicines according to the user's requirement.
- The machine adopts separation sectional combination: PVC forming, Feeding, Heating sealing for one section; Tropical cold aluminum forming, Heating sealing and cutting for another one section for separately packaging.
- It adopts electrical controlling system to make PVC, PTP, be cut automatically to guarantee the Synchronous stability of over- length distance and stations.
- It can be optional equipped with photocell correction device, imported stepper motor traction and image- character register to optimize packing grade.

- The machine is suitable for packaging of capsule, tablet, coating pills, syringes, medical instruments electronics and etc.
- All of working stations are adopted four columns for position. It is with stability performance and easy operation. New design Blister packing machine for tablet/capsule/honey.
- It can add pressing station. It can be with total of four working stations of forming, sealing, pressing and cutting. It is widely suitable for all requirements of packaging. New design DPP-120 Blister packing machine for tablet/capsule/honey
- It can add Waste edge device, The waste is in good consistent and clean after cut. It's easy to clean.
- Box body can be adjusted through swing type gear with level. It is easy to adjust and check. New design DPP-120 Blister packing machine for tablet/capsule/honey.
- PVC film roller is built-in, it's sealing and dust-free.

Technical Parameters

Project	PARAMETERS
Cutting Frequency	Al-plastic:10-40Times/min
	Al-Al:10-30Times/min
Travel Range	30-100mm (Adjustable)
Max forming area	120×90mm
Max Forming Depth	20mm(customized according to customer requirements)
Main motor power	0.75kw
Upper heating power	0.5kw
Lower heating power	0.5kw
Heat sealing heating power	0.5kw
Air volume flow	≥0.2m ² /min
Air pump pressure	0.4-0.6Mpa
PVC	0.25-0.5×130mm
PTP	0.02-0.035×130mm
Dialysis paper	50-100g×130mm
Overall dimensions	2070×650×1060 mm
Weight	About560kg
