

Fully Automatic Carton Box Sealing Machine RY-BZ-3

This Fully automatic carton box sealing machine has a simple structure, convenient and practical. Mainly applied to cartons automatically converted roof, while the carton up and down, "a" type sealing, replacement of manual adjustment carton size carton size, fit the same specifications carton sealing its time; simple, easy to use, easy to adjust, sealing speed, high efficiency, durable, can be used alone, but also with post supporting the use of automated packaging lines.

The Fully automatic carton box sealing machine applied to household appliances, textiles, food, general merchandise, medicine, light industry, chemical industry and other industries packaging, carton sealing;

Characteristics:

1. Based on Taiwanese technology and applied with imported spare parts, electrical elements and pneumatic elements.
2. Automatic folding of top cover of carton, automatic perfect sticking of adhesive tapes on top and bottom at fast speed
3. Manually adjust carton width and height based on carton size
4. Install blade protection device to avoid accidental knifing-injury in operation
5. With simple operation, it can be operated separately or combined into production line

Technical Parameters:

Model	RY-BZ-3 Fully automatic carton box sealing machine
Sealing Capacity	≥10 boxes/min
Table height	min: 600mm max:700mm
Air pressure	0.4-0.6Mpa
Suitable tape	W48/60/75mm*L1000 code
Supply Voltage	220V/ 50HZ/200W
Overall Dimension	L1780xW1000xH1510mm
Weight	250Kg
