

Semi-Automatic Capsule Filling Machine JTJ-V Horizontal Type

The machine is equipped with electric and air control devices and an automatic counting device, and can automatically complete the whole filling process in sequence from positioning empty capsules to separating empty capsules to filling capsules to locking filled capsules.

It is suitable for filling the capsules in sizes 00#, 0#, 1#, 2#, 3#, 4# and safety capsule. It can be customized to fill capsules from size 000# size 5# but the filling speed will slow down.

The filling amount can be adjusted by the number of rotations of the dosing disk. The powder feeder also has an auger to regulate the powder filling.

This improvement results in faster production, meeting cGMP requirements, more accurate filling, safer operation, simple maintenance, super low noise, easy cleaning and less labor intensive.

Specifications

Model	JTJ-V
Control Panel	Siemens
Capsule Size	000#, 00L#, 00#, 0L#, 0#, 1#, 2#, 3#, 4#
Capacity	10,000 to 15,000 per hour
Electrical Supply	As electrical facilities vary from country to country, please provide your specifications at time of order so that the correct motors are supplied with your machine
Compressed Air	40m ³ /h
Overall Dimensions	Length: 1140mm
	Width: 700mm
	Height: 1630mm
	Weight: 380Kg
Package Size	Length: 1650mm
	Width: 800mm
	Height: 1750mm
	Weight: 500Kg
