

Rotary Tube Filling Machine

Filling Range: 5 gm to 1 Kg (with the help of Change Parts)

Output: 15 to 40 bottles per minute. (Depending upon Ointment Characteristics and Filling Size)

Applicable Industry:

Pharmaceutical, Ayurvedic, Nutraceutical, Cosmetic, Food, Agrochemical and relevant

Suitable for Different Types of Material like Cream, Ointment, Paste and Relevant

Features:

- Heavy duty base with robust construction off S.S. matt finished body
- Machine exclusively designed for laminated and plastic tubes
- Machine is capable of filling, sealing crimping, batch coding and ejecting all in one stroke
- The machine uses patented hot air sealing system, which is one of the most reliable sealing systems for plastic and laminate tube
- Multiple Filling range with arrangement of different change parts
- No tubes No fill arrangement
- Easy and accurate adjustments of fill desired quantity with the help of change parts
- Suitable for Cosmetic, Pharmaceuticals, Nutraceutical, Ayurvedic, Dairy, Chemical, Food Industries
