

Cream Filling Capping Machine

Automatic Cream Filling & Capping Machine is new generation utility product, developed from most advanced technology to suit marketing demands. The machine uses high quality SUS304 stainless steel plunger type metering pump to perform filling, combine automatic cover, automatic cover, mechanical and electrical together. Economical and applicable, with small footprint. Widely used in the liquid packaging of pharmaceutical, food, pesticide, chemical, cosmetics and other industries. Fully meet the requirements of GMP.

Technical Parameters:

Item	8/2	4/1
Filling Nozzles	8	4
Capping Heads	2	1
Capacity	3000-5000bph	2000-3000bph
Power	≤2.2KW	≤1.2KW
Dimension	2200*1200*1600mm	2000*1200*1600mm
Weight	1000KG	800KG
Filling Range	20-500ml	
Ideal Filling Range	20-100ml, 50-250ml, 100-500ml	
Optional Cap Type	the ftproof cap, screw thread cap, ROPP cap	
Filling Precision	≤±1%	
Capping Precision	≥99%	
Voltage	220V 50/60Hz	
Air Pressure Range	0.4-0.6Mpa
