

YPK-4012 Automatic Case Erector

The automatic erector machine is used for the forming and sealing of cartons. The maximum opening speed of the vertical opening mode of the machine can reach 12 boxes per minute. It is usually used in conjunction with the sealing machine, packing machine and other equipment to form an automatic packaging production line.

Characteristics:

- * Automatic suction box, forming and sealing are completed
- * Max. speed: 12boxes/min
- * Clamshell panels, repair warranty.
- * Imported electrical configuration, more stable performance
- * Can be used alone or in conjunction with the conveyor line.

Variants & Options:

- * Customized by the carton size
- * Overlep can be customized
- * Voltage
- * Electrical parts brand
- * Stainless steel frame

Technical Parameter

Model	YPK-4012/15/18
Voltage	220V 50Hz 1P
Power	200W
Speed	9-12 boxes/min
Table Height	620mm
Air	6kg/cm ²
Specification	Motor:Taiwan
	Blade:SKD11
	Cylinder/Solenoid valve: AIRTAC
	PLC:Siemens
	Touchscreen:Siemens
	Electrical key parts: Schneider / Omron
Applicable carton	Max size : L450*W400*H400mm
	Mini size : L250*W150*H100mm
Tape	W48-75mm
Machine Size	L2100*W2100*H1480 mm
Machine Weight	450kg
