

# HONGREAT®

## *Blood Tube Labeling Machine*

This blood tube labeling machine is used for medical disposable blood collection tube labeling process. The machine is composed of product transfer system, label machine, packaging machine, programmable logic control panel, electronic panel and other advanced functions, with accurate precision and robustness, to ensure the efficiency and effectiveness of the production process. All the safety parts of the blood tube labeling machine have been taken into account, including all the moving parts.

### **Advantages**

The label is transported using a stepping motor, and the label and tube are inspected using photoelectric detection. This sturdy blood tube labeling machine has the ability to label at the most 15000 units in an hour. In addition, the height of label height is adjustable to fits different label position on the bottle. We can provide safe and maintenance free cargo handling services according to different application requirements.

- Production capacity: 10,000-15,000 pcs/h
- Tube size: Ø13\*75mm; Ø13\*100mm; Ø16\*100mm
- Power: 500W/AC220V
- Overall dimension: 2200×700×1500mm (L×W×H)
