Semi Automatic Carton Sealing Machine

Semi-automatic carton sealing machine adopts the adhesive tape sealing carton sealing, which is economical and quick to adjust. It can complete the upper and lower sealing actions at one time, and can also use printing tape to improve the product image.

Semi-automatic carton sealing machine is the first choice for enterprise automatic packaging.

Pushing the carton containing the product into the sealing machine will automatically fold the carton cover and automatically seal the carton up and down.

JG semi-automatic carton sealing machine suitable various sizes of cartons through adjusting the height and the width of the machine. It need hand to folding the top covers and push cartons to conveyor.

Features:

1. Top and bottom belt drive,
2. Tool safety system to prevent the tool from being stabbed by the knife;
3. Available in steel and stainless steel types;
4. Adopt international advanced technology and select imported parts and electrical components;
5. The width and height can be adjusted manually according to the carton specifications;
6. The sealing effect is smooth and beautiful.
7. It can be used in stand-alone operation or in conjunction with an automated packaging line.

Application:

Semi-automatic carton sealing machine is one of the best choices for improving the efficiency and cost saving of large and medium-sized enterprises such as daily necessities, electronics, toys, printing, hardware, food, clothing and communication.

Technical Parameters:

Working speed	18M/min
Max. packing size	L ∞ ×W500×H450mm
Min. packing size	L150×W250×H90mm
Table height	Mim.550mm, Max.750mm
Applicable tape	48mm, 60mm, 75mm (Choose one type)
Power supply	110V, 220-240V, 50/60Hz, 1 Phase
Power	240W
Machine size	L860×W930×H1250mm
Machine weight	150kg
