

## V Type Stainless Steel Mixer VH-100/200/300/500/1000

The V-type mixer series is an asymmetric mixer, which is a new type of fine container rotary and agitating mixing equipment. It is suitable for the mixing of powder or granular materials in the chemical, food, pharmaceutical, feed, ceramic, metallurgical and other industries. The mixer has a high degree of mixing, it also achieves a good degree of mixing with small ingredients. The machine is reasonable in structure, simple in operation, closed in operation, convenient in feeding and discharging. (Manual or vacuum feeding) The cylinder is made of stainless steel for easy cleaning.

### Features:

1. This machine mixing cylinder structure special, efficiency is high, no blind angle, material adopt stainless steel, wall polishing treatment, nice appearance, equally mixing.
2. It can as per customer's request equip mixer, it can applied to fine powder material mixing.
3. The machine applied to good liquidity dry powder and granular material mixing in pharmacy industry, chemical industry, food industry.

### Parameter:

Model	VH-200	VH-300	VH-500	VH-1000
Volume(L)	200	300	500	1000
Loading factor(L)	80	120	200	400
Proper loading(kg)	56	84	140	280
L*W*H(mm)	2010*850*1440	2220*900*1470	2300*910*2050	2800*1000*2880
Diameter(mm)	450	500	600	800
Inlet diameter(mm)	300	300	330	400
Outlet diameter(mm)	100	100	200	200
Drum speed(kw)	15	15	13	10
Power(kw)	1.5	1.5	2.2	3.0
Weight(kg)	340	400	478	700
