Product Catalog

Cartoners

KYTE Series

KYTE SERIES

Intermittent Cartoners for collated products.
Speeds from 20 to 60 cpm

KYTE SERIES

Mainly meant for difficult products which cannot be handled in a continuous motion model, these machines can even collate products before being loaded into the carton. Pencils, soaps, candles, blisters are a few examples of these.

Also, larger products which do not require higher speeds are ideal for use in this series of cartoners, wherein various models are available.

Features

- Automatic in-feed/transfer systems for varied products
- Quick tool-less changeover
- Leaflet feeding
- Leaflet pre-insertion (for delicate products)
- Different types of coding
- Tuck-in / Hot-melt carton closures
- Centralised lubrication system

Carton Closure - Gluing

Horizontal Continuous Motion Cartoners for medium and high speeds. 120 to 300 cpm

HARRIER

Vertical Cartoner for low speeds

OSPREY SERIES

Collating & Wrapping of cartons and cuboids

KESTREL SERIES

Casepacker for varying products and speed range

About Us

With the wealth of experience and expertise garnered by its parent company SUBNIL over nearly 25 years in the packaging industry, VECTACRAFT specialises in innovating cartoners, bundlers and casepackers with speeds in cartoners starting from 25 cpm and going up to the 300 cpm rate which its flagship, the MERLIN 300XC, boasts.

VECTACRAFT exists, quite simply, to offer sound, custom-made solutions that can link fluently with any upstream primary packing machine, and also follow through to the end of the line.

Pencils, blister strips, pouches, tubes, sachets, bearings, bottles, vials are just a few of the varied products that are easily handled - individually, collated or in combination with other products or inserts. And the broad array of product sizes we allow for, coupled with the opportunity to benefit from ultramodern technology at smart prices has catapulted VECTACRAFT into every discerning buyer's consideration set. In fact, VECTACRAFT aims to position itself as the definitive one-stop-shop for anyone seeking a post-primary packaging answer.

The young, firebrand sales team at VECTACRAFT is driven by its goal to identify every type of packaging problem that a manufacturer may encounter. Our uncompromising Research & Development division devotes itself to coming up with ways to decimate these problems. And the finesse of our production personnel, of course, really puts the 'craft' in VECTACRAFT.

Geared to invigorate the assembly line and revolutionise the industry, this truly is the future of secondary packaging automation.

Our Customers

Abbott**Dabur****Havell's****PZ Cussons****American Lion****Emami****Hindustan
Unilever****Ranbaxy****Ajanta****FDC****Indoco****Sanofi-Aventis****Alkem****Elder****Ipca****Unique****Balsara****GSK****Knoll****Wockhardt****Cadila****Glenmark****Paras****Zandu****Cheryl**

We leave no stone unturned when it comes to customising solutions. More often than not, we work closely with the upstream machine producer, in our endeavour to offer our customers an integrated line. If necessary, we even have it brought into our workshop to undertake the integration. This helps us in simulating an actual production sequence. But that's not all. We often provide, upon request, add-on equipment that we may not even manufacture, as part of the line, if it suits a customer's requirements better.

To us, customer satisfaction and trust are of paramount value. And closing a sale is merely the beginning of bonds that are forged over time. Today, there are only a handful of players in the industry that can go the distance and VECTACRAFT, let it be said, intends to lead the pack.
