FK-SX Cache Printing 3 Header Card Labeling Machine

FK-SX Cache printing-3 header card labeling machine is suitable for flat surface printing and labeling. According to the scanned information, the database matches the corresponding content and sends it to the printer. At the same time, the label is printed after receiving the execution instruction sent by the labeling system, and the labeling head sucks and prints for a good label, the object sensor detects the signal and executes the labeling action. High-precision labeling highlights the excellent quality of products and enhances competitiveness. It is widely used in packaging, food, toys, daily chemical, electronics, medicine and other industries.

Technical Parameters:

Parameter	Date
Label Specification	Adhesive sticker, transparent or opaque
Labeling Tolerance(mm)	±1
Capacity (pcs/min)	30~60
Suit product size(mm)	L:800~1500; W:100~300; H:500~1000; Can be customized (We can make it according to your the sample diameter)
Suit label size(mm)	L:20-150;W(H):20-100
Machine Size(L*W*H)(mm)	≈1700*1000*1400
Pack Size(L*W*H)(mm)	≈1750*1010*1450
Voltage	220V/50(60)HZ;Can be customized
Power(W)	1020
N.W(KG)	≈195.0
G.W(KG)	≈360.0
Label Roll(mm)	ID:＞76; OD:≤300
