

## *Metal Plastic Tube Filling - MTD 12*

Our full-automatic tube filling machine that can fill metal and plastic tubes, MTD12E, is a high capacity machine that can be used for various purposes in food and chemistry sectors. Furthermore, the machine can be used with plastic tubes by adding them hot air unit and necessary equipments. With the help of different patterns, various diameter tubes can be filled.

### **Technical Details:**

Capacity	1800 – 2250 Tube/hour (Plastic&Laminated)
	2000 – 2500 Tube/hour (Metal)
Tube Diameter	10-42 mm (Metal Tube)
	10-50 mm (Plastic&Laminated Tube)
Tube Length	50- 180 mm (Metal – Plastic)
Installed Elektriciry Power	6 kw
Average Elektriciry Power	2 kw (Metal tube)
	4 kw (Plastic Tube)
Pressured Air Consumption	6 bar 200NI/min (Plastic Tube)
	150NI/min (Metal tube)
