

Vertical Form Fill Seal Machines TWFx

TWFx is designed as our V.F.F.S next-generation model which has intelligent functions such as automatic film meandering correction device even in high-speed production, contamination detection by the end seal 2-axis servomotors, and film-end forecast & announcement function. Maintenance of the machine can be efficiently carried out by widely accessible structure and LED lights located inside. Usability for operator has been improved in film change and format change.

Specifications:

Bag Size Range	Bag Width	50 - 200mm
	Bag Length	50 - 300mm
Packaging Speed	Max. 120 bpm	
Machine Dimensions	W 979 x D 1741 x H 1420 mm	
Machine Weight	Approx. 800 kg
