

Automatic Packing Machine

Automatic packing machine produced by HOPEWIN. It combines counting and packing to increase efficiency. The countable products are diverse and the packaging can be adjusted according to client needs. The unified counting and packaging increases production capacity. Counting different products does not require changing the parts. It can count products which include pills, tablets, capsules, gel capsules, transparent capsules.

Description

1. Unified counting and packaging for high production efficiency.
2. Counting different products without tools replacement and adjustment.
3. A wide range of applications include tablets, capsules, soft capsules and transparent products, without tooling change over or adjustment.
4. Equipped with dust recycling pipelines: the machine will stop automatically and send out alarms indicating the need to clean the dust on the window in case of an accumulation of thick dust.
5. All product contact parts are made of 304 or 316(optional), meeting the G.M.P requirements, which are easy to dismantle for clean-up and maintenance.
6. The packaging machine is equipped with a PLC control system with a touch screen interface for easy control.
7. Customizable packaging dimensions: length 50mm ~ 310mm and width 50mm ~ 160mm
8. Compatible packaging materials: PET*PE、PET*PP、PET*AL*PE、PET*AL*PP
9. LCD display shows the parameters and machine status and also has the self-diagnosis function.
10. Its simple structure allows for easy cleaning, maintenance and repair.

Specification

- Capacity : 5 ~ 40 BPM
- Counting Range 1 ~ 9,999 purchase per bag
- Product Size : #00 ~ #05 capsules ,soft capsules ,3~20mm tablets
- Power Supply : AC 220V ,Single Phase 50/60Hz
- Air Consumption : 6 kg/ ,50 liters/min
- Consumed Power : 4500W
- Hopper Volume : 25 liters
- Net Weight : 700kg
- Dimension : 1750D*850W*1900~2200H mm(with conveyer)
