

Pharmaceutical Powder Rotary Granulator XZL-300

This Granulator Machine is the ideal equipment used in such trades as pharmaceutical, foodstuff, irruptive dosage chemical, solid beverage and so on, especially for the material with high viscosity. Many food factories use this granulator machine to make chicken essence. This machine has the advantages of efficient threshing, beautiful threshing, automatic threshing, avoid false threshing fracture. This Pelletizing Machine is easy to operate, easy to clean and highly automatic.

Technical Parameters:

- Model: XZL-300
- Capacity(kg/h): 120-300
- Overall Size(L*W*H)(mm): 1350*800*1400
- Weight(kg): 480
