

## BY-400 Sugar Coating Machine

Water chestnut-shape sugar coater is used for coater tablets that are pressed into forms, especially for thin film coating in pharmaceutic industry, as well as in food and chemical industries.

After polishing, the surface of the coated tablet is bright, the coating prevents it from oxidizing, being wet or evaporating, hides the uncomfortable flavor, makes it identifiable and alleviates the dissolution in human bodies.

### Features

- This coating pot is made of stainless steel, meet the GMP standard.
- Transmission steady, performance reliable.
- Convenient to wash and maintain.
- High thermal efficiency.
- It can produce the technological requirement and regulate coating in one pot of angle at the same time, and is easy to use.

### Technical Parameters

Model	BY-400
Dia.of pot(mm)	400
Capacity(kg/t)	15
Inclination(adjustable)	15-45
Revolution of pot(r/min)	40
motor	Y802-4 380V /220V 0.75KW 1400r/ min
Blower motor	CZR 220V 60W

Power of heating cord(w)	internal heating 1000W
	external heating 1000W
Temperature atport of heated air	50-75
Dimensions(mm)	830*600*1430
Weight(kg)	105
