

## *FWJ-2 Automatic Tube Pasta Filling Machine*

FWJ-2 automatic aluminum tube filling and sealing machine adopts full stainless steel, filling and sealing, easy observation, easy operation, easy maintenance; Button control equipment, wide turntable driven by CAM, fast speed, high precision, box and hang on type tube, can choose; On the armrest automatically aluminium tube feeding on tube station; Photoelectric for standard workstation, with high-precision sensor, stepper motor control, such as aluminum tube design in the correct position, activity type note heads deep inside the hose note material, no tube no filling. Sealing flexible manipulator pluripotent, can be adjusted by different method, complete the twenty percent, thirty percent, while black saddle folding; Play word workstation automatically word printed in the position of the technological requirements.

### **Technical Parameters**

Power supply	220 V, 50 HZ
Motor power	1.1 KW
Air supply, Gas supply pressure	0.6 to 0.8 (MPa)
Gas consumption	< 30 (dm after/min)
Filling quantity	5-75 (ml) 20-150-30-250 (ml)
Production capacity	30 to 60 (/)
Measuring accuracy	< 2%
Dimension	1300 * 900 * 1800 mm
Weight:	400kg
