

B-GF-50 Inner-Heating Filling Sealing Machine

The B•GF-50 filling sealing machine is an inner-heating type, with multi-purpose filling, sealing and date printing. This inner-heating filling sealing equipment is mainly used to package products in daily chemistry, pharmacy, food and other industries. This filling sealer uses the automatic incubation and automatic positioning; PLC control system ensures hot air is heated in inner tube. This filling sealing machine can adjust the filling doses automatically, and meanwhile, the dose can be displayed. Particularly, it is suitable for plastic sealing end. And the appearance of the end is nice and sturdy. This equipment will accurately dispense products that are water-thin to viscous gels, mascaras to lipstick, shampoos, serums, lotions, and creams.

Features:

1. This filling sealing machine has stable performance, high speed, high efficiency. Its mechanism structure ensures the convenient operation.
2. It is environmental friendly, because of low noise.
3. In addition, it has convenient maintenance and no faults.

Main Technical Parameters:

Tube material	Plastic, laminated, aluminium and lead tubes
Power Supply	380(220) V/50Hz
Air Source	0.55-0.65 MPa
Electric motor	1.1 kw
Hot sealing Power	3.0 kw
Filling Quantity	5ml-250 ml
Dosage Precision	≤±1%
Production Speed	20-50 pcs/min
Tube Diameters Sealed	φ10-φ50 mm
Dimensions (L×W×H)	2000×950×1900 mm
Weight (kg)	850 kg

Boom Industry is a professional manufacturer and supplier of the inner-heating filling sealing machine in China. With 15 years experience of producing, selling and service in this inner-heating filling sealing equipment, we have exported them worldwide like the United States, Japan, Russia, Australia, New Zealand, Indonesia, Malaysia, India, Burma, Italy, France, Nigeria, Vietnam, Iran, Syria, Kazakhstan, Poland, Romania etc, more than 80 countries and regions, and gain great reputation among those customers. If you need inner-heating filling sealing machines, please contact us.
