

# Automatic Vertical Multi Material Granule Powder Sachet Packing Machine MZH-65BDS

This Automatic vertical multi material granule powder sachet packing machine is applicable to the food industry particle x powder x liquid x sauce and particle powder material combination of items such as measurement packaging

## Detailed introduction

1. This Vertical Multi Material Sachet Packing Machine has a variety of blanking systems, can choose a variety of good flow of particles or powder into the bag at the same time. For example, bear, flower and sugar are packed in one bag by weight. It can be customized to your bag. And can automatically complete the bag-making, measuring, blanking, sealing, cutting, counting, according to customer requirements can be configured to print the batch number and other functions
2. This Granule Packing Machine PLC touch screen operation control, bag length, driving a stepper motor control performance stability \* detection accurate adjustment convenient o intelligent temperature controller, PID control, can reduce the error range of temperature control within 1 Š

Blanking method:	according to the customer demand selection (attached blanking structure)
Measuring range:	1-10 g(2-30ml)o for single material
Form of sealing:	three-side sealing * back sealing * four-side sealing
Packaging speed:	30-60 packages per minute (depending on the characteristics of materials)
Outer bag size: length:	length: 30-170 (mm)o width: 30-140 (mm)
Power source:	220V/ 50Hz/ 1.4kw
Total weight:	about 500 KG
Dimensions:	800*1100*1750(mm) (l*w*h)
