

Easy-to-clean PU Belt Conveyor

The PU belt conveyor is well suitable for the free-flowing products in the food, agriculture, cosmetic and chemical industry.

Features:

- The Easy-to-clean PU belt uses polyurethane as the main body and stretch-resistant aramid yarn as the backbone for one-time extrusion. This structure has no cloth layer and no cracks, which eliminates the hidden danger of layering of the conveyor belt and the space that is prone to breed bacteria, and thus greatly reduces the time for cleaning the conveyor belt.
- The pu belt conveyor allows for controlled feeds at one or more locations and can easily interface with various types of feeding devices.
- The design of the conveyor is very compact, it only take minutes to install and disassemble.
- The conveyor belt is very easy to clean. You can wash it by water directly and no need to disassemble the belt.

Optional parts:

- Machine frame: #304 / #316 stainless steel
- PVC, PP, PU, stainless steel belt.
- Make as per client's requirements.

Technical Parameters:

Model	FM-3F3 Inclined Conveyor
Machine Frame	304 stainless steel
Belt Material	Easy-to-clean PU belt
Production Capacity	4-6.5m ³ /h
Machine Height	To be customized
Voltage	AC220v or three phase 380v, 50hz/60hz
Power Supply	1.1kw
