

Nail Polish Filling And Capping Machine XQZGX-JY12

Application:

1. It is widely used in precision, quantitative loading / dilution of pharmaceutical, pharmaceutical, food, chemical, cosmetic and other industries.
2. Pre-chromatography preparation, pharmaceutical QC and R&D, environmental monitoring, mineral and blood analysis, forensic identification.
3. Used for precise quantitative loading / dilution of blood, biological reagents, oral agents, injections, advanced cosmetics, flavors, fungicides and other liquids.

Characteristic

1. Intelligent operating system with touch screen is used.
2. Liquid filling part: constant pressure feeding, suitable for filling medium and high viscosity liquids.
3. 304 stainless steel appearance, desktop structure, practical and convenient.
4. The part of the capping is turned down by pneumatic torque to ensure the consistency of the tightness of the cover.
5. This machine adopts the way of quick filling of bottle molds, which can be easily and quickly replaced among different bottle types.
6. This equipment adopts German sensor to realize the functions of no filling without bottle, no capping without lids.
7. Can be customized according to the need to increase the plug or cover and other functions.
8. Taiwan brand pneumatic components are adopted.

Technical parameters

Model	XQZGX-JY12
Manufacturing speed	0- 35PCS / minute
Tank capacity	SS304 5L / 10L / 20L
Size of Host Machine	500*550*650(mm)
Power	AC 220V 50-60Hz 450W
Air pressure	0.4-0.6Mpa
