

## *Hot-melt Glue Carton Erector*

Hot-melt glue carton erector has been widely used to folding and forming cartons in different speculations before they are used in the beer, beverage and food production line. The capacity is 30-40 cartons per minute.

The Carton erector belongs to packaging equipment which can be divided into two types, hot-melt carton erector and tape carton erector. It has been widely used to folding and erecting cartons in different speculations before they are used in the beer, beverage and food production line.

### **Description:**

Automatic hot-melt glue carton erector is fit for medium and high speed production line with its good stability in continuous linear operation.

### **Technical advantages:**

1. Low investment, quick return
2. Advanced device layout
3. International general accessories
4. Lower waste, higher productivity
5. Easy operation, rapid replacement
6. User friendly interface
7. Complete after-sales service

### **Main components:**

1. Hopper
2. Chunk mechanism
3. Carton propeller
4. Friction belt mechanism (no power)
5. Inside Folding device
6. Outside folding device
7. Feeding mechanism

- 8. Shaping mechanism
- 9. Carton Pressing mechanism

**Application:**

Hot-melt glue carton erectors are widely used in folding and forming different specifications of cartons before there are used in beer, beverage and food production line.

| <b>Model</b>            | <b>WSD-CX30</b>  | <b>WSD-CX40</b>  |
|-------------------------|------------------|------------------|
| Capacity (cartons/min.) | 30 CPM           | 36 CPM           |
