

## ZX-16L Automatic Stand-up Pouch Filling Capping Machine

The whole process of the machine, feeding pouch-quantitative filling-spout mouth washing-cap regulating and feeding-capping-pouch discharges and liquid level controlling, are all fully automatic control. The machine is used for fill and cap stand-up pouch with jelly juice, soy milk, pure water, yoghurt, edible oil, seasoning and detergent etc. The machine is controlled by PLC+TOUCH SCREEN. It is new food packaging equipment of reasonable structure, advanced performance, high automation and high speed.

### Technical parameters:

型号/Model	充填量/Filling volume	产量 (袋/小时) Output(pouches/hour)
ZX-12L	≤2500ml	1500-3000
ZX-16L	≤1000ml	3000-7500
ZX-24L	≤350ml	8000-12000
