

Pneumatic Pouch Packing Machine VT-150-MHW

Manufacturers and sellers of different types of products like food, cosmetics, medicines, spices, chips and other items need to pack their products in pouches before they sell it to the customers in the market. This task is done easily with the help of automatic machines. A pneumatic pouch packing machine is available for the purpose of sealing and packing pouches. The machine is available in various types like automatic and semi-automatic versions. Apart from this, manual machines are also available. Sealing is done from three sides. The machine makes a center seal also. Vista techno pack machines Mumbai give you an opportunity to get a top-quality pneumatic pouch making machine for your business. Pouches of very lightweight from ten to fifty grams and heavy pouches of four hundred to six hundred grams weight can be packed with the machine. The machine has a compact size and it has a low maintenance.

Product Details:
