

Automatic Bag Given Packaging Machine for Powder

Automatic Bag Given Packaging Machine for Powder is able to pack wide range type of bags, including stand up bag, side spout bag, etc, it supports linear weighed for packing the granular of chicken, MSG and other food ingredients. The excellent sealing function ensures that the sealing quality is great; It is able to meet the customized requirement.

- The packaging process is controlled by PLC with packaging signal; the intelligent function helps to reduce the waste of material
- Intelligent function of no bag no filling and sealing, it avoid wasting bags when in this situation.
- The equipment works stable with Mechanical cam working style; it has high capacity output and lower power consumption, durable for long-term working.
- Equipped with human-machine interface and Advanced PLC inside, stable circuit structure, easy to operate and low maintenance cost.
- It adopt mechanical cam, low cost with less oiling parts.

Specification:

Capacity	According to different products & packaging machine
Bag style	Standup bag, flat bag (3sides & 4sides bag), PE bag, gusset bag, zipper bag & so on.
Sealing method	Hot sealing
Products	Chicken granule, MSG & different food ingredients, seed, grains, fish food, salt, chemical product, sugar, pesticides & so on
Size	L4500mm*W2500mm*H3600mm
