

Fully Automatic L Type Sealing and Cutting Shrink Wrapping Machine RY-LTM-500

This automatic L type sealing and cutting shrink wrapping machine, widely used in assembly line work for large quantity package with high work efficiency, equipped with a pinning hole device, adjustable film feeding system and adjustable conveying platform, meets different requirements for different products and it has a kissing device for packing the small products.

When packing different sizes of products, this fully automatic L type sealing and cutting shrink wrapping machine is very simple to adjust, need not to exchange any molds or any bag-making device.

Can be added easy tearing function according to the customer's requirements.

Technical parts:

Type	RY-LTM-500 Fully automatic L type sealing and cutting shrink wrapping machine
Voltage	220v 50/60HZ
Power	1.35KW
Product Length size	< 600mm
Product width and High size	< 500mm (H < 140mm)
UPH	15-30bags/min
Air source	0.5Mpa
Machine size	1750x900x1450mm
Weight	300kg
