

PGZ-W Series Bottle Water Drink Filling Machine

Bottle Water Filling Machine can apply for pure water, mineral water, etc. It suitable to PET bottles with all volumes and shapes.

Features:

1. 3-in-1 monoblock is composed of rinser, filler and capper
2. It is driven by star wheel, then bottle clamp plate may rotate to convey bottle, thus achieving fully automatic bottle washing, bottling and capping with the advantages of low wear, simple bottle replacement, accurate and stable conveying and scientific procedures.
3. The input bottle adopts air conveying device and the output bottle adopts adjustable speed way, which combines with the transducer of the host machine making the output bottle running more stable and reliable.
4. It adopts new micro-negative pressure filling, stable and reliable.

Technical Parameters:

Model		PGZ-W18	PGZ-W24	PGZ-W32
Washing Heads		18	24	32
Filling Heads		18	24	32
Capping Heads		6	8	10
Capacity	BPH	8000	12000	15000
Power	KW	2.2	2.2	3
Machine Size	mm	2800*2200*2700	2900*2200*2750	3380*2600*2750
