

Vertical Type Automatic Liquid Packaging Machine XY-60BY

Characteristic:

1. Bag, measuring, filling, sealing, cutting, counting automatic completion.
2. The computer controlled stepper motor pull bags, regardless of length or cursor tracking bag, set and cutting, without air conditioning in one step, saving time and film.
3. Temperature independent PID control, more suitable for packaging materials.
4. Can be equipped with devices: printer ribbon, inflatable devices, exhaust, horizontal seal punching device, a rotary cutter, small knife, beat former unit, batch cut pneumatic knife.
5. The driving system is simple, more reliable, more convenient maintenance.
6. Packaging materials: polyester/polyethylene (PET/PE), paper/polyethylene (Paper/PE), polyester/aluminum/polyethylene (PET/AL/PE), OPP/PE (OPP/PE)

Performance: A liquid crystal display, intelligent control, fault alarm, intelligent dual solid state temperature, circulation of wind power control box is designed for 24 hours for the 304 # stainless steel. It adopts filled with the filling of oneself and certain quantity. The seal is firm seal and long-shaped fully.

Technical data:

Model	XY-60BY
Bag Size Making	L: 30-180mm W: 30-140mm
Thickness of Packing Film	0.03-0.07mm
Diameter of Rolling Paper	Less than 300
Dimensions	700x900x1700 (mm)
Packing Speed	30-60 Bags/min
Power	1.9KW/220V
Measure Range	3-150 ML
Weight	400 kg
