

HS250 Rice Pillow Type Packaging Machine

The transducer also with the machine from Panasonic brand to keep machine work more stable.

Main performance and structural features

- * It's convenient in bag length control with advanced dual frequency conversion design;
- * Reasonable complete machine design and stable performance; simple in operation with PLC full computerization;
- * Precise sealing and cutting with high precision photoelectric tracking system;
- * Positioned stop function without sticking to the reamer and wasting the roll film

Technical Parameters

Item	HS-250	HS-250A
Film width	60-250MM	
bag-making length	65-190MM/120-280MM	90-220MM/140-330MM
bag-making width	30-110MM	
production height	Max.40mm	Max.60mm
packing material	OPP/PE/PVC, OPP/PP, KOP/PP,ALU-FOIL	
thickness of film	0.03-0.07MM	
packaging speed	40-230 bags/min	
power specification	3.4kw/220,50/60hz	
machine dimension	(L)3770*(W)640*(H)1350mm	
gross weight	500G	
optional device	printer, Air-filling device, feeder, Tidier, alcohol spray device
