

Pills polishing machine PGJ series

This machine is widely applied to the tablet, ball and pill materials polishing process in the industry of pharmaceutical, food and chemical.

Structure & Function

- Assemble of cleaning, heating, liquid-spraying, powder-spraying, dust removing and humidity-extracting devices.
- Innovative design in combination of worm gear reducer and angle-adjustable container.
- PLC and touch screen control system makes the operation easy.
- Photoelectric monitor ensure the process perfect.
- Completely comply to GMP standard.
- Customized manufactures are available and welcome.

Parameters

Model No.	Diameter of container (mm)	Power (KW)	Size of Shape (mm)
PGJ-800 (4 Containers)	Φ800	14.8	4300x1400x1900
PGJ-800 (6 Containers)	Φ800	19.0	6500x1400x1900
PGJ-800 (8 Containers)	Φ800	24.0	8500x1400x1900
PGJ-1000 (4 Containers)	Φ1000	8.8	4180x1290x1550
PGJ-1000 (6 Containers)	Φ1000	13.2	6250x1290x1550
PGJ-1000 (12 Containers)	Φ1000	26.4	12460x1290x1550
