

GOLDEN LIN

Micro-computer Weigher CA-5

Applications:

- Food, Coffee, Crackers, candies, peanuts, melon seeds, legumes, sesames, powder balls, monosodium glutamate, salt, dumpling, tapioca deals, sugar, powder feed and grain feed
- Electronic parts, hardware (small hard ward, screws....etc)

Characters:

Professional design and independent operation, During the process, abnormality in any group of packing can be displayed, if any, operation in the other groups won't be effected. Digitalized control system, humanized operating design, easy to operate. Target weight can be changed anything. Accurate calculation saves packing time and boosts work efficiency.

This machine consumes minimum power, and conforms to the maximum economic benefits. Several decades of designing and manufacturing experiences enable us to design machine according to customer's need. Single roll, double rolls, four rolls and eight rolls are available. Tailor-made packing speed fits your working space.

Technical Parameters:

Material	SUS304
Conveyor Type	Vibration conveyor (Coil 110W* 15 pcs)
Sensor	RECHNER - Germany Brand
Pneumatic Components	BOSCH -Germany Brand
Loadcell	HBM- Germany Brand
Feeding	Pneumatic type
Speed	15-50, (according to exactly production size)
Voltage	AC110V/220V, 50/60Hz
Motor	1650W
Air Force	7619ml/ minutes
