

FF-S130 Tin Can Capping Machine

FF-S130 tin can capping machine can cap the beer can, aluminum can, paper can etc. The tin can capping machine has a conveyor and high capping capacity. Also the OEM service is acceptable. The tin can capping machine can feed the lid to the can to get more production capacity. You can send us your tin can samples for the machine testing.

The can sealing machine has the advantages of good sealing quality, high safety performance, simple and compact structure, convenient operation and maintenance, small volume, light weight, low noise, and can be sealed with a small number of accessories. The machine is easy to operate! The roll seal is smooth without burr and leakage.

Technology data sheet:

Model	FF-S130
Capping Material	Aluminum Cover
Capping Head	1
Capping Hob	4pcs (2 pcs first capping, 2 pcs second capping)
Voltage	AC380/50Hz/60Hz
Power	1.9KW
Production capacity	30-50 (times / min)
Can Height	40-200mm
Can Diameter	35-130mm(150mm OEM)
Dimensions	3000mm*900mm*1700mm
Net weight	500 kgs
Air Pressure	0.4-0.8MPA, 0.15M3/Min
