

Small Bag Milk Tea Milk Powder Cartoning Machine

Small Bag Milk Tea Milk Powder Cartoning Machine is a kind of packaging machinery, capable of completing all kinds of complex cartoning work. Its machine inching device makes the equipment can be moved at will, so that it is easy to adjust various specifications of boxes. It is a kind of packaging equipment with automatic program control, which is easy and fast to operate, does not occupy space and has various functions.

Machine features:

1. Small Bag Milk Tea Milk Powder Cartoning Machine adopts PLC microcomputer automatic control.
2. The man-machine interface operating system is adopted to automatically display the performance parameters such as packing speed, quantity and fault cause,
3. The self-lubricating system is adopted to make the operation more stable.
4. The body is made of high-quality stainless steel, baking paint and aluminum.
5. Multiple specifications can be adjusted and used within the specified range of the machine.
6. Manual and automatic conversion functions.
7. This machine can be equipped with hot melt adhesive machine.

Technical data:

applicable industry	Food industry: small bags of milk tea, milk powder, meal substitute powder, coffee bars, etc
production speed	40-60 boxes / min
carton requirements	250-320 g / m ²
gas consumption	10 ~ 15L / M
gas source pressure	0.6 ~ 0.8MPa
