

ZBJ-1000 Rolling Type Vacuum Packing Machine

Vacuum packing machine can finish the function of vacuuming, printing, cool down and air exhaust. Can prevent good from oxygenation, mould, damaged by worms and become damp, can prolong the storage time.

Advantage:

1. Low noise, transmit smooth.
2. Low failure, without motor, can reduce the faults related to motors.
3. The working of conveyor belt and working chamber are controlled by pneumatic cylinders, which can save energy without motor.
4. High quality sealing, cylinder control transmission accurate location, will not shaken and damage the heating strip and influence the sealing quality.

Main Parts:

- **PLC:** MITSUBI, Japan brand
- **Display:** Liyang, Taiwan brand
- **Contacto:** Schneider, France brand
- **Transformer:** Made in China
- **Shell:** SUS304 stainless steel
- **Vacuum Pump:** Huasheng 2X-15 pump, Shanghai brand or German pump

Technical Parameters:

Model	ZBJ-1000
Packing Speed	1-4time/min
Vacuum Pump	108m3/hour
Vacuum Degree	≤200MPa
Machine Weight	600kg
Sealing Size	1000*10mm*1strip
Vacuum Chamber Size	L1000*W500*H100mm
Machine Size	L1800*W1550*H1300mm
Voltage/Power	380V/50Hz/5.5KW (with pump)
