

MGS Machine – Model MatriX™ Horizontal Case Packer (Pharmaceutical)

The MGS Machine Model MatriX™ is a case packer capable of speeds up to 15 CPM.

- Positive vacuum case opener insures tough cases will open;
- Ergonomically designed case magazine is easy to load preventing operator injury and strain;
- Tool-less adjustments allow for fast and accurate changeovers;
- Metric design meets international standards;
- Infeed collator design permits inspection of product to be loaded as part of your serialization solution.
