

Push Pull Cap Assembly Machine

This cap assembly machine can assemble all kinds of plastic bottle caps, and can smoothly assemble the inner and outer parts of ejector caps, implosion caps, caps with explosion-proof rings and anti-counterfeit tooth caps.

Features:

The size of the device can be customized according to the customer's requirements, and the operation speed can be adjusted according to the manual control.

Due to the slow speed of manual covering, low efficiency, the capping effect does not work, resulting in higher costs for manufacturers. Based on the market needs, our company independently developed a cap assembly machine to fill the gap in the market.

Product Specifications:

Product name	Bottle cap assembly machine
Power supply	AC220V 380V 10% 50HZ 60HZ
Power	1.5Kw
Compressed air pressure	0.4~0.6Mpa
Specification of cap	20-50mm
Lining speed	100-160caps/min
Main machine size	4200*2400*1300mm
Color	Gray
Weight	550kg
