

FJZ type powder metering packing machine

Purpose and brief

This machine is injection production lines of powder filling machine, used for various bottles of antibiotic powder quantitative packaging and tamponade, using PLC control, touch screen setting, convenient adjustment, high precision measurement by screw control, accurate measurement, high degree of automation.

Main technique parameters

Production capacity: 80 ~ 120 bottles per minute

Suitable bottle: penicillin bottle

Weight: 0.2g ~ 5g

Load precision: 2 ~ 4%

Plug rate: 99%

Power source: 380V 50Hz three-phase four wire system

Power rate: 2Kw

Dimensions: 1700 x 1300 x 1800
