

## *Automatic Jelly Filling Machine/Jelly Packaging Machine GG-330Y*

1. This Auto jelly filling machine is mainly utilized in jelly, pure normal water, whole milk, soy products sauce, vinegar, and health care and compound water quantitative packing can immediately complete olenoid valve manage circulation gauging--programming (recommended)--handbag generating--satisfying--securing--keeping track of.
2. Personal computer/PLC control process, photoelectric tracking, enhances the full machine management the, precision and reliability intellectualized level. The preparing sizing,bodyweight might be changeable. According to clients special requires, also, can be customize.
3. Has mistake display program, an easy task to work and keep. Protection security.
4. Equipment system and meals coming in contact with component are made by stainless steel. Have higher preferred in Europe, Southern Africa, and so on.

### **Advantage:**

- Computer/PLC control system, photoelectric tracking, maximize the whole machine's control precision, reliability and the intellectualized degree.
- Completely replace manual,automatically complete olenoid valve control flow,measuring--coding,(optional)--bag,making--filling--sealing--counting.
- High quality stainless steel, no corrosion, wear, suitable for food

**Technical Parameters:**

<b>Model</b>	<b>GG-330Y</b>
Packing speed	30-80 bags/min
Packing range	5-200ml
Film width	≤ 280mm
Making bag size	L:50-330mm, W: 15-130mm
Packing accuracy	≤ ±1%
Power	1.6 KW
Power supply	AC220V, 50/60Hz
Seal type	Pillow seal, 4 sides seal
Net weight	250kg
Machine dimension	L600*W790*H1800mm
