

ZX-C Double Scale Particle Weighing Machine

It is suitable for quantitative packaging of peanut, melon seeds, seeds, fertilizers, pesticides, grain and other granular, coarse powder materials. Combining self-flow cutting with vibration cutting, electronic weighing and metering is fast and accurate

Performance Characteristics

- PLC control, Chinese touch screen operation, only need to input weight parameters, the system can automatically calculate fast and slow additions, and can automatically track and correct errors.
- Electronic scales can directly measure and load more accurately.
- PLC control, strong anti-interference.
- Double scale measurement, higher efficiency.
- All stainless steel structure.
- Artificial bagging, photoelectric induction, automatic measurement.
- Vibration module with voltages stabilization function overcomes the measurement error caused by voltage instability.

Technical Parameters:

Packaging Specification	500g-25kg
Packing speed	600-1500 bags/hour
Packaging accuracy	<0.1-0.2%
Power supply	AC380V 50/60Hz
Whole machine power	2.7Kw
Weight of whole machine	350Kg
Size	1000 * 750 * 2200mm
