

GMP Standard Pharmacy Powder Filling Capping Machine DH-Q2-80

This machine has a simple design, provides reliable filling and weighing.

It can be integrated with check-weigher to ensure accuracy in quantity during the packaging process.

Change-over is simple since you do not need tools for fastening.

All product contact parts are made from stainless steel, making it more durable and hygienic.

It can be integrated with other filling systems like auger systems, cup fillers, or high-speed combination weighing system.

It works faster, safely and it can fill products into containers that have different sizes, shapes, and types that are rigid

Food products that can be filled using this machine include spices, nuts, cheese, infant formula, baby food, and pet food.

It can also be used by other industries like pharmaceutical, agriculture, and cosmetic industries.

Technical Parameters

Model	DH-Q2-80
Container size	20-80mm;H 15-150mm
Filling weight	10-500g
Filling speed	40-60 bottles per min
Filling accuracy	less than 500g, $\leq \pm 1\%$
	More than 500g, $\leq \pm 0.5\%$
Power supply	3P AV 208-415V 50/60HZ
Air supply	6kg/cm ² 0.05m ³ /min
Total power	2.51kw
Overall size	2000*1070*2420mm
