

HZGR-4 Automatic 4 Heads Rotary Pump Filling Machine

This machine is the ideal equipment for filling high viscosity fluid, paste.

Applicable to medicine, cosmetic, food, pesticide and special industries.

Features:

1. The machine is equipped with a rotor pump, which is small in size and has a large filling range.
2. The machine is made of 304 stainless steel, which is food grade.
3. Servo motor drives rotor pump, high filling accuracy.
4. PLC and touch screen control panel, easily adjust various filling parameters.
5. It can be connected with automatic labeling machine and capping machine to form a product line.

Technical Parameters:

Mobel	HZGR-4
Filling Range:	50-5000ML
Capacity of Hopper:	135L
Filling speed:	15-35BPM
Filling accuracy	±0.5%
Machine weight	300kg
Machine size	2000*1050*1950mm
