

SL-5314 Simple Plane Labeling Machine

Features

1. High-precision stepping motor, torque can reach 8 N·m, labeling speed can reach 30 m/min.
2. The dual-stage clutch design makes the label tension more stable and facilitates the improvement of labeling accuracy.
3. Advanced man-machine interface control system.
4. PLC control of famous factory, high reliability.
5. Wheel design, easy to move to different occasions, fast adjustment, can realize automatic labeling on any product.

Technical Parameter

- Labeling speed: 30-50m/min
- Labeling accuracy: ± 1 mm
- Maximum label width: 100mm
- Applicable paper roll Inner diameter: $\phi 76$ mm
- Applicable paper roll outer diameter: $\phi 300$ mm
- Machine size (LxWxH): L1000xD650xH1600mm
- Power consumption: 220V 50Hz 1000W
