

## *NF-30 Semi-automatic Hose Filling And Sealing Machine*

The NF-30 aluminum tube potting machine is mainly used for the primary transmission principle. The indexing mechanism is used to drive the rotary table equipped with the clamp for intermittent movement, and the automatic filling and the two sides of the tail, the three-side folding tail and the saddle-shaped folding and sealing work are completed. The shape and size of the seal can be easily and accurately adjusted according to the needs of the user.

It is a good product for the cosmetics industry, pharmaceutical industry, adhesive industry, shoe polish industry and other related industries.

### **Features:**

- Easy to operate and maintain.
- Automatic positioning, filling, welding, cutting and trimming, printing code in one time.
- Stainless steel machine body, strong and beautiful looks.
- Sealing mould can be customized according to customer requirements. Can seal many size of tubes.
- Ultrasonic Sealing Machine power source for the pneumatic, working steady, not easy to damage, customers can rest assured use.
- Ultrasonic frequency can meet international standard, no harmful to human being or environment.
- Can be work in time, not need wait the heat time.

Technical Parameters

Model	NF-30
Suitable for	Cosmetic cream, lotion, gel, toothpaste, sauce, glue and so on
Filling volume	1-250ml
Production capacity	1-30 Tubes per min
Voltage	110/220/380V customized
Power	750w
Weight	300Kg
Size	1200x820x1650 (mm)(L*W*H)
