

SF Series Pulverizer

SF universal pulverizing machine uses high-speed relative motion between movable and fixed teeth discs. Raw materials will be impacted by teeth and friction. Finally they are crushed. Universal pulverizer is widely used for pharmaceutical industry, chemical industry, pesticide industry, foodstuff industry, grain industry, and so on.

Features

1. SF universal pulverizing machine overcomes the shortcomings of old models such as roughness and accumulated powder.
2. Products made by our universal pulverizer meet the GMP requirements.
3. It improves the utilization ratio of supplies and reduces the cost.
4. SF universal pulverizing machine has simple and solid structure, resulting in easy and steady operation.
5. Changchun universal pulverizer can crush different sizes of raw materials by changing screens with different meshes.

Parameters

Model	20B	30B	40B
Max. Speed (r/min)	45000	3800	3400
Production Capacity (kg/h)	60-150	100-300	160-800
Diameter of Material (mm)	6	10	12
Fineness (mesh)	10-120		
Motor Power (kW)	4	7.5	11
Blower Power (kW))	1.5	1.5	1.5
Overall Size (mm)	1100 × 600 × 1650	1200 × 650 × 1650	1350 × 700 × 1700
