

## HC-180D Duplex Horizontal Flat Pouch Packing Machine

This series of packaging machines is a type that can meet the requirements of high-quality packaging, especially suitable for users with high production capacity. Its production capacity is twice that of ordinary horizontal machines, greatly improving production efficiency. It can achieve three-side sealing and four-side sealing bag types, suitable for packaging materials such as powders, particles, liquids, pastes, solids, etc. It adopts roll film forming, which also reduces packaging costs.

### Technical Parameters:

Model	HC-180D
Type Of Pouch	3/4 side seal
Min. pouch Size	70×100mm
Max. Pouch Size	90×210mm
Packing Speed	<100 pouch per min
Packing Range	max 100ml
Power	5.5kw
Volt	380V 3P 50Hz
Air Consumption	300L/min
Air Pressure	0.6MPa
Machine Weight	1600kg
Filling station	2
Machine Dimension	3800×1000×1450mm
