

HM V6+ Blister Packaging Machine

HM V6+ is a blister packaging machine for solid dose products such as tablets and gelatin capsules, in which is suitable for small and medium sized production. This model is considered as the most flexible blister packaging line with high production efficiency. HM V6 is applicable to wide range of thermoforming and cold forming blisters packaging along versatile pharmaceutical blister systems. PLC integrated along with a touch panel creates an operator friendly environment, such as one-touch quick tool setting and supportive GMP directives.

Features

- PLC control system and HMI touch screen
- Intermittent platen sealing
- Mechanical CAM driven on strong spline shaft
- Easy setting by dial indicator
- Applicable to versatile system
- Available for 21 CFR Part 11

Specification

Model	HM V6+
output	270 bpm
sealing principle	Platen sealing
format range (width x index)	280 x 145 mm
