

J-120K Water Needle Type Cartoning Machine /Cartoner

Performance characteristics:

1. The main control components of the whole equipment are Siemens brand.
2. Inverter speed regulation, using PLC automatic control system.
3. Adopt a 7.0-inch 256-color human-machine interface operating system, automatically display performance parameters such as box speed and quantity, and display the cause of the fault and operation and maintenance methods.
4. Multi-specification adjustment can be realized within the specified range in the equipment of the same platform.
5. Manual and automatic conversion functions.
6. Complete the folding box function of the manual synchronously. (Optional)
7. Print the three-row batch number synchronously on the medicine box. (Optional)
8. There is an automatic detection system, and the online culling function of the paper cassette that lacks books is performed. (Optional)
9. The box sealing method is two kinds of locking type and viscose type. (Optional)
10. There is a secondary conveying and feeding method to prevent breaking the injection product.
11. There is a tray in place detection function to prevent the injection from breaking.
12. The machine can be connected to the front and rear related equipment for production.

Technical Parameters:

1. Box speed: 40~120 boxes/min
2. Adaptation range: carton length × width × height (60~150) × (30~90) × (12~42)
3. Size of the manual: length × width (80~250) × (90~180)
4. Power supply: 380V 50Hz
5. Main motor power: 1.5kW
6. Compressed air pressure: 0.6MPa
7. Compressed air gas consumption: 60~90L/min
8. Equipment weight: 1100kg

Note: Other models can be consulted for other sizes
